

Trapac® Safety Hook

Klöber's installation instructions should be followed closely when fitting this product.

Trapac® Safety Hooks are for fixing loads such as roofers' ladders in place while work is being carried out on the roof. They are available in three versions to suit slate and profiled concrete and clay tiles and plain tiles.

Product features & benefits

- Quick & easy to install
- Corrosion-resistant - galvanised and powder coated
- The hook's 45mm offset for concrete and clay tiles allows it to be easily fitted to the rafter
- Special fixing screws included
- Safety equipment can also be hung on the eyelet
- Suitable to carry loads in the direction of the roof's fall line

Area of application

Suitable for:

- Most clay & concrete interlocking tiles & slates
- New build & refurbishment

Material

Galvanised steel 30 x 6mm; S 235 J2 G3C according to DIN EN 10025

Packaging

10 pieces per carton including 32 nails

Colour codes

Red	-0100
Galvanised	-0370
Anthracite	-0430

Regulations

- CE-certified
- Complies with DIN EN 517 – Type A for loads in the direction of the roof's fall-line
